**PLEASE READ ALL DIRECTIONS BEFORE STARTING INSTALLATION**

Fig. A

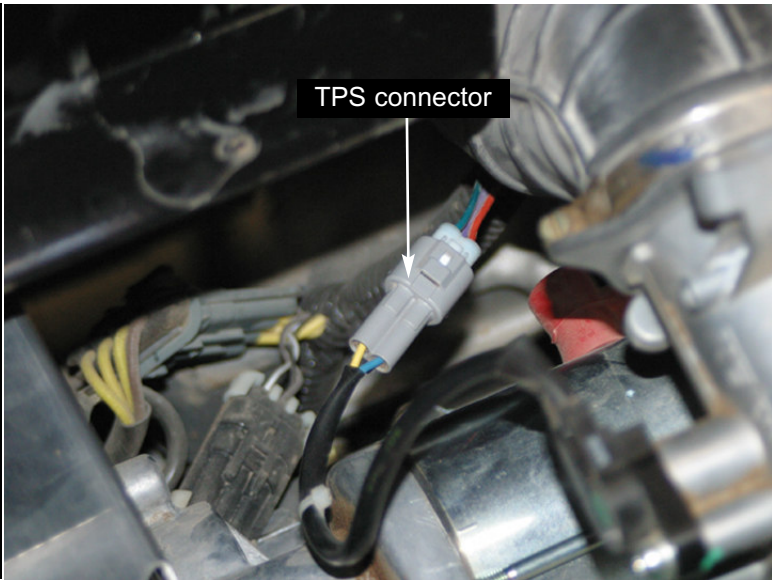

- 1 Remove the seat.
- 2 Unplug the connectors from the injector leads (Fig. A).

Fig. B

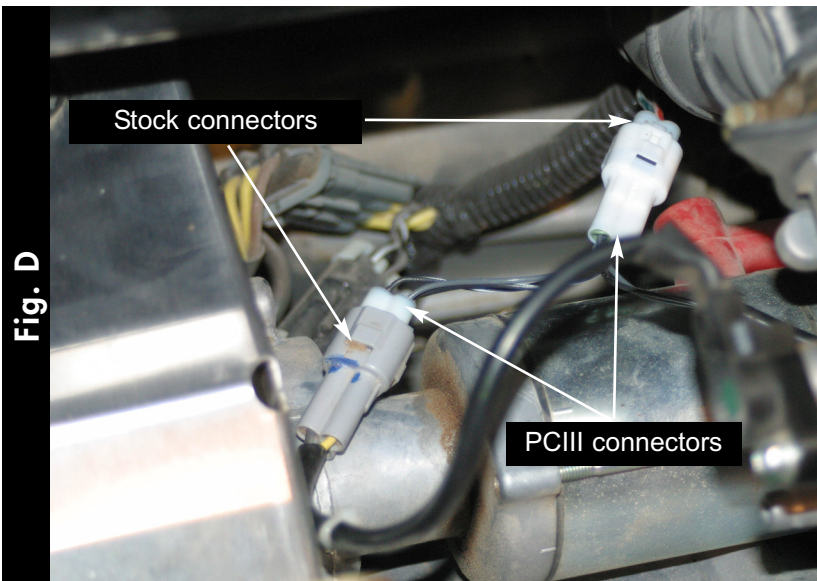

- 3 Connect the PCIII in-line of the stock wiring harness and the injectors (Fig. B).

Fig. C

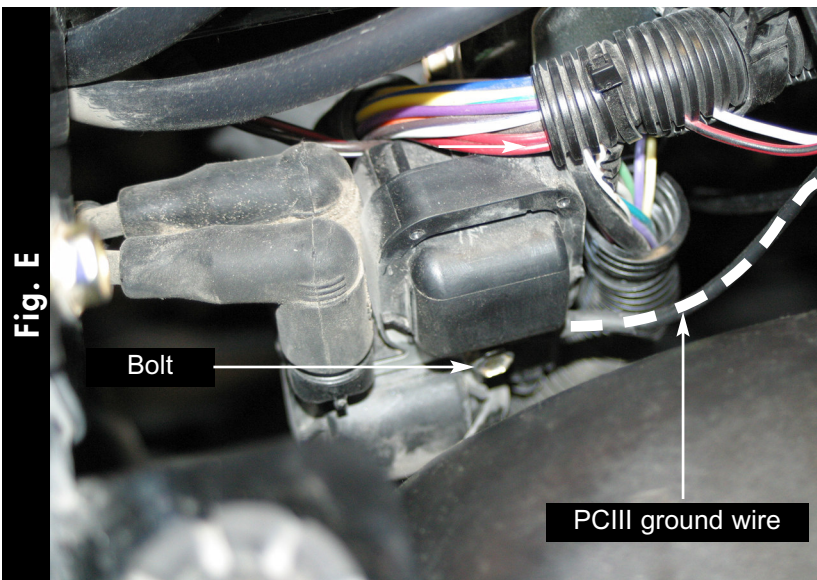

- 4 Locate the stock Throttle Position Connector on the right hand side of the throttle body. This is a GREY 3 pin connector (Fig. C).
- 5 Unplug this connector.

Fig. D

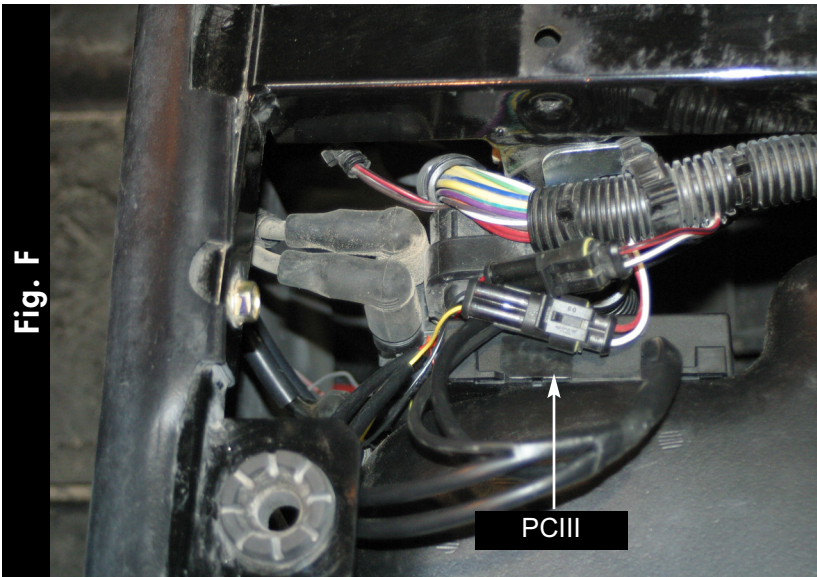

- 6 Route the white connectors from the PCIII from the fuel tank area to the throttle body, routing the harness underneath the frame and under the intake snorkel.
- 7 Plug the connectors from the PCIII in-line of the stock TPS connector and wiring harness (Fig. D).

Fig. E

- 8 Remove the bolt that holds the coil pack to the bracket (Fig. E).  
This coil pack is located next to the fuel tank
- 9 Reinstall the bolt thru the ground wire of the PCIII and then to the bracket (Fig. E).

Fig. F

- 10 Install the PCIII to the side of the fuel tank using the supplied velcro (Fig. F).  
Make sure to use the alcohol swab to clean both surfaces before attaching.
