**European Models Only** 

1980-83 Suzuki GS850 2-Valve

## Stage 3

For mildly tuned machines using the stock airbox, with stock or K&N filter. May also be used with a good aftermarket exhaust system K&N filter #RC-0984

This graph shows a typical gain with a Dynojet jet kit.

## **WARNING**

## NO SMOKING! NO OPEN FLAME! WHILE INSTALLING YOUR DYNOJET KIT

Parts List		
4	Main Jets	DJ155
4	Main Jets	DJ160
4	Main Jets	DJ165
4	Main Air Correctors	DCO301
4	Fuel Needles	DNO405
4	Adjusting Washers	DW0001
4	E-clips	DE0001
1	Tool	DT002
1	Glue	DA0001
1	Slide Drill	DD #7/64

## STAGE THREE INSTRUCTIONS

Slide Lift Hole

- 1. Remove the vacuum slide from the carbs. Remove the stock needles & spacers, noting order of assembly. Using the slide drill (DD# 7/64) provided enlarge your slide lift hole. Do **not** drill the needle hole.
- 2. Install the Dynojet needles on groove #3, using all stock spacers. Install the Dynojet washers above the E-clip.
- 3. Remove the stock main jets and replace with the Dynojet main jets provided. If you are running the stock exhaust use the DJ165 main jets, if you are running an aftermarket header or slip-on, use the DJ160 main jets. Be sure that the jets you are changing are the main jets.
- 5. Locate the main air jet passage (Fig. B). With the flat end facing into the carb, install the main air correctors provided (DCO301). Use the tool provided (DT002) to tap lightly in place. With the glue provided lightly touch a dab on the outer edge of the air corrector. Allow glue to dry.
- 6. Locate the fuel mixture screw (Fig. B). Carefully turn mixture screws clockwise until they seat, turn out 4-1/2 turns.
